

Summer Curiosity Camps at West Sound Academy & Poulsbo parks

These fun camps integrate science, technology, engineering, art, math and outdoor play for an engaging summer learning experience. You will conduct experiments, create art, build, play and have a great time with friends old and new. Having fun with art, science and nature fosters lifelong appreciation and curiosity for learning. All sessions are led by veteran teacher and camp director Tim Lowell. Tim is the author of “Is it Gonna Blow Up?” - A guide to creating happy young Scientists, Engineers, Builders and artists. He is a teaching member with Bainbridge Arts in Education and has taught in schools throughout Kitsap and King county.
